

Pilot Operation Support

<Concept>

Assistance for pilot operation by shore-based organizations

<Roles>

Shore-based organizations obtain information from a ship intending to enter port; information includes views from the bridge.

Shore-based organizations reproduce the views from the bridge on the screen, and provide necessary assistance.

<Benefits>

All the information relating to pilot can be obtained by shore-based organizations (pilot assistance center). Better coordination can be expected by shore-based organizations.

Support in case of Emergency

<Concept>

Shore-based organizations monitor situation inside the ship in case of emergency and provide appropriate advice or instruction.
